

Cold Galvanize Spray / Degreaser

COLD GALVANIZE ZINC SPRAY

Corrosion Inhibitor

14 oz. Spray Can

Regular Cold Galvanize Spray

LPS Cold Galvanize is a zinc rich coating that performs like a hot dip galvanize to prevent rust and corrosion on all types of metal. LPS Cold Galvanize is specially formulated to provide a tough, flexible coating that won't crack or peel even in extreme heat or cold.

- Dry to touch in 3 to 5 min.
- Coverage: Approx. 50 sq. feet
- Will not yellow, chalk, crack or peel
- Electrochemically protects bare metal
- 14 oz. spray can
- Dull gray finish

LOOSE LPS REGULAR

13 oz. Spray Can

BrightCoat Cold Galvanize Spray

LPS BrightCoat Cold Galvanize is a zinc rich coating that performs like a hot dip galvanize to prevent rust and corrosion on all types of metal. LPS BrightCoat Cold Galvanize is specially formulated to provide a tough, flexible coating that won't crack or peel even in extreme heat or cold.

- Dry to touch in 15 to 30 min.
- Coverage: Approx. 25 - 30 sq. feet
- Will not yellow, chalk, crack or peel
- Electrochemically protects bare metal
- 13 oz. spray can
- Reflective (bright) silver-gray finish

LOOSE LPS BRIGHT

Tubing Degreaser Concentrate

JTC prepares metal for painting. Its non flammable and mixes with water. Biodegradable in its natural form. Removes grease and light surface rust. 1 gallon plastic containers. Low V.O.C. rating of 103.

*Mixes with
water 6 to 1
(That's 6 parts water
to 1 part cleaner)
or mix at a
higher ratio for
lighter jobs*

1 Gallon Cans
